Exolium®

Exolium products were developed to support your animals' claw, skin and udder health. Thanks to their specific composition, Exolium products are widely applicable and very suitable for both individual or group application. In addition to their broad applicability, all products are free of antibiotics, formalin and copper sulphate. As a result, there is no risk of antibiotic resistance and the products are safe for animals, users and the environment. Exolium products are extremely suitable to contribute sustainably to your business operations.

What is Exolium® Skin protection spray?

Exolium Skin protection spray is a nourishing spray for claws and skin, based on copper and zinc chelates and a unique combination of oils. The spray is easily absorbed by the skin and the components penetrate quickly and deeply. The oils in Exolium Skin protection spray also ensure that the skin remains soft and supple and feels cool.

The spray is ready to use. Thanks to the handy pocket size you always have it at hand. On top of that, Exolium Skin protection spray contains almost 5 times more active product than comparable products that contain propellants.

When to use?

- ◆ For general skin care
- ◆ During and after hoof trimming

Application

Exolium® Skin protection spray is available in an innovative 250 ml spray can based on air pressure. Because of this the spray is not only free of antibiotics and propellants, but it also contains almost 5 times more active product and it sprays in all positions, even upside down. Next to a great ease of use, this also ensures you of a safe and environmentally friendly product.
